Honing & Polishing

GL 25

Universal polishing cream for all natural stone, marble, granite and agglomerates.

GL 25 is a water-based cream to polish surfaces. This advanced product, thanks to its special formula, can polish Marble and Granites as if they were the same material, without any difference in brightness or without needing different products to polish the same floor.

GL 25 is ideal to polish mixed floorings, made of Marble, Limestone, Travertine, Granite, Quartz. The product does not leave any defects and has a high bright vitreous effect with excellent resistance to foot traffic. The product is suitable for the maintenance of big surfaces, allowing light but effective maintenance. The product does not require water for application, it enhances brightness, and restores the original color of the material, should it be partially lost.

BENEFITS

- ✓ High brightness
- ✓ High hardness
- ✓ Resistance to foot traffic
- ✓ Fast result
- ✓ Closure against soiling agents

USES

For interiors and exteriors: Marble, Limestone, Travertine, Granites, Quartz.

COVERAGE 50-70 m²/Lt.

APPLICATION EQUIPMENT Single disc machine with at least 2 HP (2.2 HP is preferable)

APPLICATION

Test on a small area before proceeding, so to ensure product suitability and final result. Proceed by treating small surface portions of about 1-2 square meters each. Put 1-2 teaspoons of product on the area to treat and start dry-buffing it, in circular motions with a single disk machine and white pad. Continue to work it even a little after it dries to remove possible residues.

To achieve a higher brightness or superficial closing, repeat the application. The product does not give any layering defect; therefore, once achieved the maximum brightness, no defect can be remarked between two areas polished separately. After polishing the surface, rinse with water and vacuum up the residues on the surface.
