A3 Polishing Compound

Description

A 3 YELLOW compound for the polishing of marbles, travertines, limestone, agglomerates and type of material containing calcium. A3 YELLOW is easy to used and offers the material a very high polishing.

How To Use

The surface to be treated with A3 YELLOW must be wax free and without any superficial film. Pour a few water drops on a 1 to 2 sqm. surface and apply spoon of powder in the centre of the area and start polishing the surface with a floor machine with a white or red pad. In order to achieve the best result, a fluid cream should form on the surface. If the cream should become dense, add a few water drops in order to recover the fluid state and follow this method during the whole course of polishing. Continue polishing for few min. per sqm. and remove the superficial residues before working on the following area. Proceed with this method until the whole of the area will be polished.

Caution

Flammable. Harmful if swallowed. On the long term, it can give negative effects to water organisms. It can give damages to lungs, if swallowed. Exposure to vapours can give skin dryness and cracks. Keep out of children's reach. Do not breathe vapour. Avoid contact with eyes and skin. Use suitable protective clothes and gloves.

Maintenance

For the regular maintenance, clean the surface with NEUGEL.

Coverage	: N.A.
Storage	: Keep the container closed and store in cool and dry place.
Shelf life	: 12 – 24 months in original sealed packing.
Packing	: 10 lb. cans (4 per carton).

Technical Data

Appearance	: Powder
Colour	: Yellow
Odour	: None
Flashing point	: Not flammable
Specific gravity	: 1.2g/ml
