K 400 NEW Maintenance Polishing Cream

Description

K 400 is fluid specifically made for the maintenance of marble, granite, agglomerates and crystallized glass marble surface subjected to high traffic and for the polishing of worn surfaces.

Maintenance

Allows to re-establish a very good sheen degree also giving to the surface power of resistance to high traffic.

Application

The product could sediment, so shake well before use. Spread on the surface approx. 20-30 g of product and cover with the white pad or steel wool of the polishing machine and start buffing at 150-300 rpm with floor machine.

Use steel wool : Proceed until a complete drying of the product has been reached.

Use white pad : Buffing to 90% dry (spread some water on the floor when the product dry too fast) then wash the floor and vacuum up the residue.

Maintenance

For the normal maintenance wash the surface with ALGAFLOOR or NEUGEL or with a neutral pH cleaner.

Caution

Avoid contact with eyes and skin. Do not swallow.

Fortuitous Leakage And Waste Disposal Method

In case material is released or spilled, clean up the most of the product and vacuum up the residues. Store the residues coming from polishing operations and commit to a specialized company.

Coverage	: 100 - 120 sq.m/lt.
Storage	: Keep the container closed and in cool and dry place.
Shelf life	: 2 - 3 years in original sealed packing.
Packing	: 5 kg. cans (4 per carton)

Technical Data

Appearance	: Slurry
Colour	: Light white grey
Odour	: Odourless
pH	: 5 - 6
Specific gravity (20%)	: 1.2 gr./cc
Flash point (ASTM D 56)	: N.R.
