MANU'

Water Based Maintenance Wax

Description

MANU' is a water based emulsion wax-resin formulated for the maintenance of treated surfaces. MANU' offers a good resistance to stains and to pedestrian traffic.

Properties

Formulated with natural and synthetic waxes is the maintenance product for most of Faber floor treatments. MANU' is very resistant to dirt and traffic. It extends the period between each maintenance program. If properly applied, MANU' does not require periodic stripping.

Where To Use

MANU' maintains the floors treated with other water base and solvent base waxes and is used as a maintenance product of all interior surfaces treated with AT LUX, AS 930, MA 90, P 211 B, NATUR WOOD, WOOD WAX.

Application

Apply MANU' pure or diluted in water (from 10% to 30% max.) by means of mop or cotton cloth. We recommend to apply the product in thin coats. Surface to be treated must be dry and clean.

Note : Do not apply the product on external surfaces.

Maintenance

For regular maintenance clean the floor with NEUGEL or a neutral ph cleaner.

Caution

Do not apply the product with air temperature below +10°C.

Fortuitous Leakage And Waste Disposal Method

In case material is released or spilled, clean up the most of the product. Absorb all residues with sand, sawdust etc. Store the residue in plastic tank and call for a specialized company.

Coverage	: 20 - 30 sq.m./lt.
Storage	: Keep the container closed and store in cool and dry place.
Shelf life	: 2 - 3 years in original sealed packing.
Packing	: 1 lt. bottles (12 per carton) - 5 lt. tin (4 per carton) - 10 lt. cans. - 25/60 lt. drum

Technical Data

Appearance	: Milky liquid
Colour	: White
Odour	: Slightly perfumed
pH	: 6,5 - 7,5
Specific gravity (20°C)	: 1,075 gr./cc
Biodegradability	: Not subject to law n. 136
Flashing point (ASTM D 56)	: None
